ONE CREATION Cooperative

ONE CREATION 
Impact finance

Why a cooperative

With ONE CREATION, governance, environment and social responsibility are no longer constraining factors in the evolution of society. The Cooperative is part of this evolution by integrating these elements as part of its DNA.

Subscribing to ONE CREATION's share capital as an investment for future generations is an innovative and sustainable alternative.

ONE CREATION focuses on creating industrial value.

An exchange platform for investors and entrepreneurs.

Investment themes with a high environmental impact.

How do we create impact with your investment?

For a minimum investment of CHF 10'000

Contribution to the development of the real economy

8 investment themes in environmental innovation

Compliance with sustainable development objectives

All this without giving up profitability for the investor

Participation in companies unlisted

Support to innovation young companies

Network synergy

Commitment to sustainable development

Towards society

By supporting only sustainable investments.

Through industrial partnership, thus acting as an amplifier of economic development.

Towards the environment

The purpose of the Cooperative is in itself a strong message carried by its members to the other actors of society.

Towards an ethic

The cooperative company structure is accompanied by an individual commitment of each member, as each member has a democratic right to vote, regardless of the number of shares he or she holds.

Towards good corporate governance

The Cooperative shall pass on the voting rights conferred on it by its holdings to those of its members who so desire.

It engages in dialogue with all the companies it decides to accompany or support while pursuing its economic goal of promoting the principles of good governance, particularly transparency.

Our philosophy

The ONE CREATION cooperative is committed to the three main areas of sustainable development, namely the economy, the environment and social issues, which are an integral part of the challenges taken into consideration when acquiring a stake.

Durability

Sustainable economic and societal model.

Innovation

Value-creating technologies.

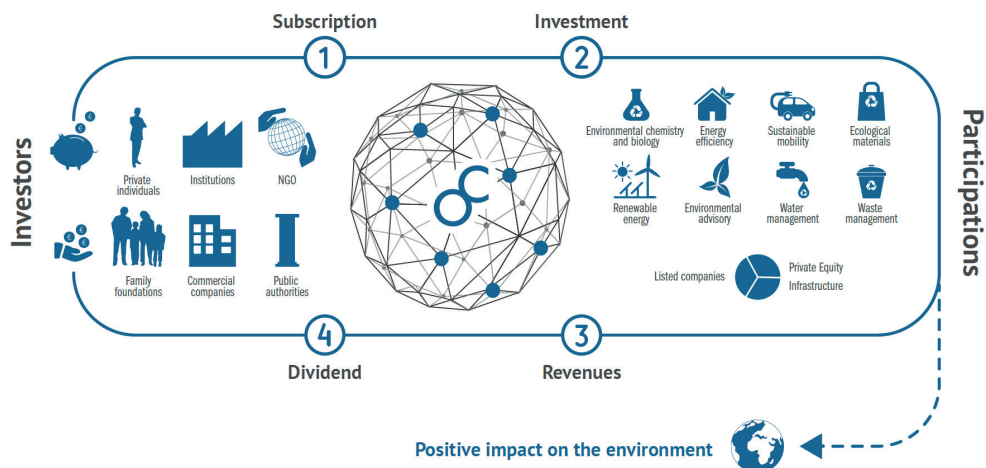

Opportunities

Environmental leverage.

ONE CREATION was created in June 2010, with the aim of financially supporting the development of environmental technologies in a global and multisectoral approach. This commitment responds to the conjunction of social, economic and environmental needs.

The Cooperative is a unique investment solution because of its committed «co-owner» approach, through equity investments in listed and unlisted companies.

The Cooperative's investment themes are renewable energies, energy efficiency, new ecological materials, environmental chemistry and biology, environmental consulting, sustainable mobility, waste management and water management and thus participates in the development and support of initiatives in favour of the environment.

Our investments

ONE CREATION invests with a double objective, to have an economic return for the partners and to have a positive impact on the environment. This is done through thematic investments in clean technologies and by controlling the risk.

ONE CREATION's portfolio is invested in three types of sustainable assets: listed companies, non-listed companies and infrastructure projects. Thanks to this diversification, ONE CREATION can provide good liquidity to investors with less volatility than an investment in only one of these categories.

ONE CREATION Cooperative aims to invest in innovative solutions to existing environmental challenges through specific investment themes.

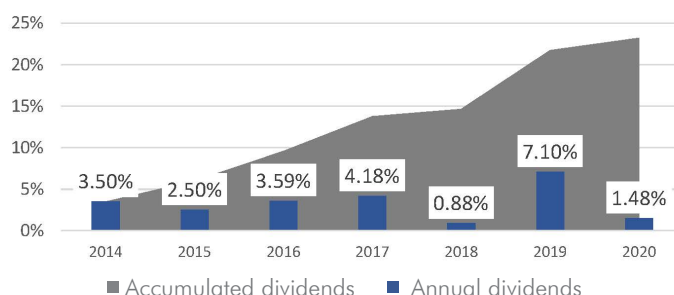

These investment themes correspond to a defined set of United Nations Sustainable Development Goals, which are used in our selection process.

Take advantage of a proven financial return

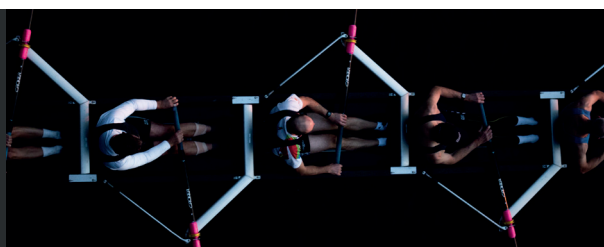

ONE CREATION redistributes all of its profits to its partners in the form of dividends.

Each shareholder has a vested right to the dividend realized at the close of the representative financial year.

Management

The management of the ONE CREATION cooperative is provided by CONINCO Explorers in finance SA, founded in 1990 and licensed by the FINMA since 2012, which has almost 31 years of proven expertise in investment consulting and financial management of pension funds.
